EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Wagner (reg. 35,398) on 12/5/2007.

2. The application has been amended as follows:

1. (Currently Amended) A computer-implemented method for examining an inlined function using a performance analysis tool, said method comprising:

identifying an inlined function in source code by using source correlation information contained within a binary executable of the source code, wherein said source code is processed for [[a]] the binary executable;

inserting a breakpoint at the start of said inlined function in said binary executable by using the start address of the inlined function obtained from the identification of the inlined function; and

replacing said inlined function with a long branch to a shared memory probe code sequence.

7. (Currently Amended) A ~~computer-readable~~ computer-storage medium embodying instructions that cause a computer to perform a method for examining an inlined function using a performance analysis tool, said method comprising:

identifying an inlined function in source code by using source correlation information contained within a binary executable of the source code, wherein said source code is processed for [[a]] the binary executable;

inserting a breakpoint at the start of said inlined function in said binary executable by using the start address of the inlined function obtained from the identification of the inlined function; and

replacing said inlined function with a long branch to a shared memory probe code sequence.

Per claim 8:

In line 1, “computer-readable” has been replaced with –computer-storage--.

Per claim 9:

In line 1, “computer-readable” has been replaced with –computer-storage--.

Per claim 10:

In line 1, “computer-readable” has been replaced with –computer-storage--.

Per claim 11:

In line 1, “computer-readable” has been replaced with –computer-storage--.

Per claim 12:

In line 1, “computer-readable” has been replaced with –computer-storage--.

13. (Currently Amended) An apparatus having a processor for examining an inlined function using a performance analysis tool, said apparatus comprising:

means for identifying an inlined function in source code by using source correlation information contained within a binary executable of the source code, wherein said source code is processed for [[a]] the binary executable;

means for inserting a breakpoint at the start of said inlined function in said binary executable by using the start address of the inlined function obtained from the identification of the inlined function; and

means for replacing said inlined function with a long branch to a shared memory probe code sequence.

Per claim 21:

In line 1, “computer-readable” has been replaced with –computer-storage--.

Application/Control Number:
